

ADocMolMag - VI edition

A EUROPEAN AWARD FOR A DOCTORAL THESIS ON MOLECULAR MAGNETISM

Entries are now being accepted for the sixth “European Award on Molecular Magnetism Doctoral Thesis”. The award will be given to three young talented researchers in the field of Molecular Magnetism or a closely related discipline. The jury will pay particular attention to the design of novel magnetic molecules and materials, discovery of new phenomena, the application of new technologies or techniques, and important steps that advance our understanding of molecular magnetism. The jury will be composed of four internationally renowned scientists working within the field.

The prize will include 500 Euro plus the registration fee towards attendance at an international event such as the European Conference of Molecular Magnetism 2021, or the Spintronic conference 2020, or at the ESMolNa school 2020, or others, where the successful candidates will also have the opportunity to present their work.

Eligibility. Candidates are eligible who submitted a PhD thesis between 1st April 2016 to 31st March 2018.

Application. The application should contain:

- 1) A **three-page summary** of the thesis, underlining the major achievements of the thesis work.
- 2) A **list of the publications** obtained from the thesis, including publications that have appeared since the thesis was submitted.
- 3) A two-page **CV** containing also contact details for the applicant.
- 4) **Up to three recommendation** letters from the supervisors of the thesis or other scientists involved in the thesis work.
- 5) The **electronic version of the thesis** and related publications in pdf format, as like as the above material, should be sent via *We transfer* (<https://www.wetransfer.com>) to:

adocmolmag@instm.it

Application can be received up to December 15th, 2019
