

JOINT EUROPEAN MAGNETIC SYMPOSIA

27 - 31 JULY 2020
LISBOA, PORTUGAL

Symposia

1. Biomagnetism and Biomedical Applications
2. Magnetic Information Storage and MRAM
3. Magnetic sensors and hybrid integration of magnetic technologies
4. Magnetization dynamics, spin waves and magnonics
5. Ultrafast laser induced magnetization dynamics and terahertz spintronics (including Magneto Optical phenomena)
6. Spin-based quantum technologies
7. Domain walls, Skyrmions and spin-orbit related phenomena
8. Spin-transfer based phenomena and devices
9. Novel 2D magnetic systems and heterostructures
10. Magnetism in molecular/ionic /organic based systems
11. Magnetic based metrology tools and techniques
12. Antiferromagnetic spintronics
13. Magnetic materials and technologies for energy applications
14. Multifunctional magnetic materials
15. Strongly correlated systems and frustrated and disordered magnetism
16. Magnetic thin-films, interfaces and multilayers
17. Magnetism based post-von-Neumann computation

IMPORTANT DATES

Abstract Submission Close
15 March 2020

Results Communication
24 April 2020
