PhD position

MSCA funding + career development + international training

Are you a material scientist seeking a PhD in Applied Nanoscience?

NeuroNanotech Doctoral Network offers 11 positions in different institutions across Europe. A great MSCA funding scheme + career development support starting September 2025.

More information and applications: neuronanotech.eu

#magnetoresistive sensors #nanomagnetism #electrochemistry #brain-machine interfaces #material development

NeuroNanotech is a Doctoral Network supported by Horizon Europe's *Marie Skłodowska-Curie Actions (MSCA)* that will train 11 PhD researchers to tackle one of the major challenges in Europe's ageing population – neurological diseases.

A highly interconnected network

Your position will be part of an international network of experts in nanotechnology, device engineering, neuroscience and clinical neurology. All individual PhD projects will be highly interconnected, ensuring interdisciplinary training.

Interdisciplinary and international training

You will benefit from a unique environment focused on training in advanced research and relevant complementary skills, imparted by an international consortium of research institutes, universities, companies, hospitals and social organisations from 9 different countries. Scan the QR and have a look!

Funded by
the European Union
